

# Guidelines for the SMART presentations:

## **1. Find a DEI-focused paper with an associated data set that you're interested in on Zenodo**

- Go to [www.zenodo.org](http://www.zenodo.org)
- Search something like “diversity equity inclusion”
- Filter by “Open” and “Dataset”
- Select a paper/dataset/project

## **2. Pick a portion of the analysis from the paper or other aspect of the data you might be interested in to present.**

## **3. Present your analysis in a Jupyter notebook**

- Use Python to load, collate, and process the data
- Provide explanatory annotations and context using Markdown
- Generate some visualization of the data/analysis
